Manufacturer
of Tiles

We Are Kajaria Eternity

With over 20 years of legacy, Kajaria Eternity leads as India's No. 1 GVT brand, blending European design with Indian craftsmanship for contemporary yet timeless tiles. Renowned for high flexural strength, breaking strength, and zero porosity, our tiles are unmatched in durability. Featuring over 1500+ designs and 13 different sizes in various finishes, our range caters to every aesthetic and spatial need. Trusted in 31 countries, including Europe, the USA, Asia Pacific, and the Middle East, Kajaria Eternity stands for lasting beauty and unparalleled quality.

Innovation drives Kajaria Eternity, leading us to adopt revolutionary Continua+ technology, propelling us to new industry heights.

With Continua+ Technology, Eternity Achieves:

- **Fully Automatic Precision:** Advanced pressing technology for large slab production.
- **Unrivalled Quality:** Unparalleled surface flatness and consistency.
- **Greater Body Strength and Flexibility:** Uniform roller pressing ensures superior body strength and flexibility.
- **Exquisite Finish:** Perfect shine and planarity.
- **Sustainability:** Optimized resource usage and reduced emissions.
- **Industry Leadership:** Leading in innovation and sustainability.
- **Customer Satisfaction:** Superior products ensuring unmatched quality and longevity.

Available Sizes

The Ultima Premium Collection of extra-large vitrified slabs by Kajaria Eternity surpasses your wildest dreams, infusing spaces with unparalleled grandeur. The expansive dimensions of these slabs not only evoke the magnificence of genuine marble but also captivate enthusiasts worldwide with their breathtaking aesthetics. In the realm of Ultima, the vast array of sizes, designs, and finishes elevates spaces to larger-than-life proportions, transforming them into magnificent showcases of luxury and style.

Ultimate Advantages

- | | |
|--|--|
|  Stain Resistant |  Easy Installation |

The Ultimate Finishes

Polish

A spectacular mirror-like effect is what you get in this superior finish. The highly polished look is achieved with a high-quality glaze that has a Reflective Index Value of more than 103% and enhancing image sharpness and giving a rich and true color experience.

Beyond

This finish is made for a luxurious world and is the most premium finish. Developed with Advanced digital technology, it has a smooth surface with almost zero surface reflection. It's a fine balance of design and elegance.

Super White

With an L value of more than 94, these striking super white tiles promise the whitest finish available in the industry.

Blend

These tiles are inspired by nature, and are made and designed using rare minerals and metals in their veins and drafted with precision, to impart real shine, adding a realistic touch of nature to your home.

Premium Polish

These tiles comprise a collection of intense colors which give the most premium feel and vividness to the surface. The high-quality transparent glaze ensures unparalleled sharpness in graphics giving it a high-definition retina image.

Lavish

Lavish's fine granules improves upon the classic Matt's anti-slip qualification. It can be mixed with other effects like metallic and woods to give a wide range of design possibility.

Marbletech

This finish is the closest thing to natural marble. The marble look is achieved with a special glaze coated on top of the design which has a reflective index of 45 degrees. Along with that, an elaborate polishing process gives the slab a marble-like smooth feel and shine.

Premium Matt

These tiles are closest to natural stones to give an ambiance of nature which make them a perfect choice for indoors as well as outdoors. The matt finish complements perfectly to your vision of creating spaces that look traditional and rustic.

Bold

As Suggested By The Descriptor 'bold', This Finish Has A Rock Like Effect. With The Use Of Special Technique And Digital Glaze Machine, These Special Effects Are Created To Give A Real Life Stone Effect.

Matt

These tiles are closest to natural stones to give an ambiance of nature which make them a perfect choice for indoors as well as outdoors. The matt finish complements perfectly to your vision of creating spaces that look traditional and rustic.

4 UNIQUE SIZES, 4 DISTINCT FINISHES
WITH STYLISH GRAPHICS

STUNNING FINISHES

POLISH

A SPECTACULAR MIRROR LIKE EFFECT IS WHAT YOU GET IN THIS SUPERIOR FINISH. THE BRILLIANT POLISH LOOK IS ACHIEVED WITH HIGH QUALITY GLAZE, THAT HAS REFLECTIVE INDEX VALUE OF MORE THAN 100%. IT ENHANCES IMAGE SHARPNESS AND CREATES A RICH AND TRUE COLOR LOOK.

THIS FINISH IS MADE FOR A LUXURIOUS WORLD AND IS THE MOST PREMIUM FINISH. DEVELOPED WITH ADVANCED DIGITAL TECHNOLOGY, IT HAS A SMOOTH SURFACE WITH ALMOST ZERO SURFACE REFLECTION. IT'S A FINE BALANCE OF DESIGN AND ELEGANCE.

BEYOND

BOLD

AS SUGGESTED BY THE DESCRIPTOR 'BOLD', THIS FINISH HAS A ROCK LIKE EFFECT. WITH THE USE OF SPECIAL TECHNIQUE AND DIGITAL GLAZE MACHINE, THESE SPECIAL EFFECTS ARE CREATED TO GIVE A REAL LIFE STONE EFFECT.

BLISS

THESE ARE DÉCOR TILES WHICH COME WITH AN EMBOSS FEEL. MADE USING HIGH QUALITY SPECIAL GLAZE AND A DIGITAL MACHINE, THEY HAVE A UNIQUE TEXTURE WHICH GIVES LINE/ARROW PUNCH EFFECT.

TRANSPORTATION, HANDLING AND STORAGE OF ULTIMA SLAB

When transporting the Ultima slabs, they must be secured properly to avoid storage problems. If the tiles are transported over a short distance, the Ultima slabs should be kept vertically in the vehicle and at back side of slabs there should be proper packing or ply to avoid breakage. If the tiles are transported over a longer distance, they should be kept on an A shape frame, as shown in Fig. A and B. With this method, we can avoid any breakage of slabs during transit.

Fig. A

Fig. B

MANUAL HANDLING OF ULTIMA SLAB

When handling Ultima slabs manually, the primary tool used is the regular suction cup (Fig. A and B). Using these, workers can shift the tiles easily.

Fig. A

Fig. B

The suction cups should be attached to the faces of the tile. As per the side, the instructions by the manufacturer should always be followed.

Fig. C

If the surface of the slab is textured, the best way to handle the Ultima slabs manually is by using a Large Format Tile (LFT) Carrier System (Fig. C) with suction cups that hold the tile from all four sides. By using this method, workers can lift or shift the tiles easily without any damage and will require the manpower of two people.

Fig. F

STORAGE

The Ultima slabs should be stored on A shape frame, made up of wood or steel with rubber lining, as shown below.

Fig. D

LAYING & FIXING

a) The Ultima slabs are very heavy, large sized, and have sharp edges. So, it is important for the people transporting the tiles to wear protective gear like gloves during transportation. We also recommend the use of double or triple suction cups for a firm grip of the tile while ensuring the safety of the operator. Before transporting the tile, it should be thoroughly cleaned to get rid of any dust or moisture and make sure that the grip of the tile is not compromised. Then the suction cups should be placed on the face of the tile and be checked for how well they are stuck to the surface before lifting the tile.

To handle the large sized slabs like Ultima slabs, we recommend using a special LFT carrier system with four suction cups.

b) The following points should be considered while laying the Ultima slabs.

1. The subfloor or the laying surface should be prepared properly before laying the Ultima slabs. The laying surface should be rigid, non-flexing, and capable of supporting the expected load with minimal or no deflection.
2. A leveled subfloor is extremely important to keep the Ultima slabs from cracking.
3. Provision of proper curing for the subfloor, for around 24 to 48 hours before tiling work.

For internal or external application, it is essential to select the appropriate cement-based, fiber-reinforced or ready-mixed adhesive to ensure that the Ultima slabs are properly fixed.

Fig. G

Fig. H

Fig. I

4. Once the subfloor is clean and ready, the adhesive should be spread evenly covering the entire area using a 10x10mm square notch trowel (Fig. G). The adhesive should cover 5cm to 10cm more than the size of the Ultima slabs. The adhesive should always be applied in stripes running parallel with the short edge to remove any air pockets or bubbles.
5. The Ultima slabs require back-buttering due to their large format. Back-buttering means applying a layer of adhesive at the back of the tile using a trowel (Fig. I). The Ultima slabs should be fixed on a handling frame with the use of suction cups in a vertical position, as shown in Fig. C.
6. To apply adhesive on the laying surface, a 10x10mm square notch trowel should be used whereas a 5x5mm square notch trowel should be used for back-buttering.
7. After fixing the Ultima slabs on a handling frame with the use of suction cups in a vertical position, it should be lowered slowly into a horizontal position and firmly pressed into the adhesive along with a surface vibrator or a rubber mallet.
8. Use a levelling system to avoid lippage and give a smooth and even surface at every joint. Levelling systems are available from 1mm to 10mm.
9. A closer system can be used to close the tiles nearer to each other and shift the tile slightly up and down at the time of fixing.
10. The backs of the slabs must be regularly checked to make sure that there is full contact between the adhesive and the tile surface. If a hollow sound is heard during fixing, the tile should be lifted again and provided with extra adhesive at that particular area to give proper strength to the tile.
11. After completing the tiling work, it is recommended to put a protection sheet on tiles until the completion of all civil work. It is recommended that the grouting work be done at the very last, after completing all civil work. We can use sanded grouts with hardener or epoxy grout, depending on the area of usage or as per instructions of the site in-charge.

TOOLS RECOMMENDED FOR ULTIMA SLABS

TILE CUTTING

Mark the portion to be cut out from the ends of the Ultima slab using a pencil. Then, properly position the cutting guide with a cutting carriage so that the references on the guide coincide with the lines marked on the slab. Lock the cutting guide with the cutting carriage in place using the suction cups. It is vital to keep the pressure and movement of the cutting carriage constant along the whole length of the cut to ensure correct scoring.

Score one end of the slab by 15cm pushing the cutting carriage towards the edge of the slab. Complete the scoring up to the opposite end of the slab.

CLEANING

CLEANING AFTER LAYING

After laying the Ultima slabs on the floor or wall, it should be cleaned well to remove any residual grouting and the normal dirt acquired from building works.

A cementitious de-scaler can be used for cleaning the joints, as it is mildly acidic and does not emit harmful fumes, ensuring the safety of the user. In case of material laid with epoxy or resinous grouting, it is recommended to clean after laying with specific detergent or tile cleaner.

REGULAR MAINTENANCE

To clean the floor thoroughly, we recommend using a natural detergent with high cleaning power. In case of strong dirt that gets encrusted with time, we recommend consulting the following ways to find the perfect solution to every situation:

TYPE OF DIRT	PRODUCT
Cement, Metal traces, rust	Cementitious descaler
Residuals, stains and halos of epoxy joints	Epoxy descaler
Grease, tire marks, colours, markers etc.	Non soap degreaser
Graffiti	Acetone and anti-graffiti

RECOMMENDATIONS

Drying Process

Once the tiles have been grouted and the excess grout has been cleaned off, it is important to wait till the tiled surface is dried completely before cleaning. The recommended waiting time is 5 days, before cleaning or using the tiled surface.

Protecting from Liquid

The newly tiled surface must be protected from water and moisture while the adhesive and grouting materials are maturing and hardening. This is particularly important for outdoor spaces and areas, where there is a risk of freezing.

Damage Prevention

It is important to protect the newly tiled surface against mechanical or chemical damage resulting from subsequent work carried out by other professionals or due to later installations. Damage can be prevented by covering the floor tiles with thick cardboard or similar material.

Cleaning Products

For the final cleaning of the tiled surface, the products used should be compatible with the chemical resistance of the tiles. Avoid using solid detergents with abrasive particles and solutions containing hydrofluoric acid, which attacks the glaze and causes irreversible damage to the vitrified tile.

Resistance to acids & alkalis (Exception of Hydrofluoric acid & its compounds)

** Vitrified tiles have resistance to most of the stains / chemicals but, it is recommended to take due care while laying and for day-to-day maintenance.

- Colours in the catalogue are as accurate as printing process allows. Please check actual tile sample before making the final selection.
- Sizes mentioned in the catalogue are nominal sizes only.
- No claim will be entertained once the tiles are fixed.
- For better laying, please follow the instructions on the packaging box.
- In case it is required to lay the tiles on wall or floor in STAGGERED PATTERN, then always lay them in Overlap 20:80 ratio, as shown in VISUAL 1 instead of Brick pattern (overlap 50:50 ratio) as shown in VISUAL 2.

- Please make sure to check the shade/finish with the sales agent/dealer before making the final purchase because there might be variation in actual finish and that shown in the catalogue. The company will not bear any loss in such case.
